

China Humanoid Robot Industry Quarterly Data Briefing — Q2 2026

Published: August 2026

Next Issue: Q3 2026 (expected November 2026)

What's Inside

本期关键词

H1 2026 output exceeds 40,000 units — full-year projected to surpass 100,000

Over 400 humanoid robot models developed — more than half of global total

H1 financing reaches RMB 104.1 billion — exceeds full-year 2025

2025 global shipments ~13,300 units — top 6 vendors all Chinese

Four-legged robots account for nearly 70% of global sales

Three numbers that matter

China's humanoid robot output reached 40,000+ units in H1 2026, up from approximately 20,000 units in all of 2025. Full-year output is projected to exceed 100,000 units — a **5× increase in a single year**.

China has developed over 400 humanoid robot models — more than half of the global total. The country's four-legged robots account for nearly **70% of global sales**.

H1 2026 industry financing reached RMB 104.1 billion, surpassing full-year 2025 by nearly 100%. June alone saw RMB 31.5 billion — a **single-month record high**.

What changed this quarter

2026 officially designated as the “mass production year” for humanoid robots

MIIT and SASAC launched the 2026 Real-Scene Training Special Action

First industry standard for embodied AI officially implemented on June 1

Data Working Group (WG7) of the Standardization Committee formally established

Morgan Stanley revised 2026 shipment forecast upward twice — from 14,000 to 50,000 units

Part 1: Market Overview

1.1 Output & Production

According to MIIT Deputy Minister Ke Jixin, China’s humanoid robot output reached approximately **20,000 units in 2025**. In H1 2026 alone, output has already exceeded **40,000 units**, with full-year projections surpassing **100,000 units**.

The industry has transitioned from single-unit prototypes and stage demonstrations to **batch delivery**. R&D, production, testing, application, and safety governance must now operate in coordinated alignment.

Output trajectory:

Period	Output	Notes
2025	~20,000 units	Full-year total
H1 2026	40,000+ units	Exceeded full-year 2025
2026E	100,000+ units	Projected full-year

1.2 Global Market Share

Global sales of quadruped and humanoid intelligent robots: for every 10 units sold globally in H1 2026, **8 were produced in China**.

Humanoid robot models: China has developed over **400 models**, representing **more than half of the global total**.

Four-legged robots: Chinese-made units account for nearly **70% of global sales**.

1.3 Market Size Projections

Morgan Stanley has revised its China humanoid robot market forecast **twice in 2026**:

Forecast Date	2026 Shipment Estimate
Early 2026	14,000 units
Spring 2026	28,000 units
June 2026	50,000 units

Market value projections: \$2 billion in 2026, expanding to **\$15 billion by 2030**.

IDC projects global humanoid robot shipments will approach **60,000 units in 2026**, with Chinese manufacturers contributing over 80%.

Part 2: Shipment Data & Competitive Landscape

2.1 Global Shipments (2025)

According to Omdia data, global humanoid robot shipments in 2025 reached approximately **13,300 units**. **All top 6 vendors were Chinese companies.**

Rank	Company	2025 Shipments	Global Share
1	Zhiyuan Robotics (AgiBot)	5,100 units	39%
2	Unitree Robotics	4,200 units	32%
3	UBTECH	1,000 units	8%
4-6	Other Chinese vendors	~3,000 units	~21%

Source: Omdia

Additional estimates: GGII data shows China's humanoid robot shipments reached **14,400 units in 2025** (84.7% of global total), with domestic shipments reaching **18,000 units**.

2.2 H1 2026 Production Leaders

MIR DATABANK data shows that **Zhiyuan Robotics and Unitree** have formed the industry's "**dual oligopoly**" structure:

Zhiyuan Robotics: Announced completion of **15,000 units** in early June

Unitree: Completed approximately **11,000 units** of mass production by March

2.3 2026 Capacity Outlook

H1 2026 capacity planning for leading enterprises exceeded **100,000 units**, with actual deliveries expected to surpass **60,000 units**.

GGII projects 2026 output could reach **100,000–200,000 units**.

Part 3: Investment & Financing

3.1 Overall Financing (H1 2026)

H1 2026 industry financing reached RMB 104.1 billion, exceeding full-year 2025 by nearly 100%. Monthly financing amounts continued to rise, with **June 2026 reaching RMB 31.5 billion** — a **single-month record high**.

Domestic financing: 105 events totaling **RMB 71 billion**, far exceeding overseas markets.

Embodied intelligence financing (IT Juzi data):

288 financing events

226 companies involved

274 investment institutions

Disclosed financing 总额 **exceeded RMB 46 billion**

Alternative estimate (GGII + Touzhong Research Institute):

137 equity financing events

Total scale **RMB 90.3 billion**

215% year-over-year growth

3.2 Notable Financing Cases (Q2 2026)

Company	Round	Amount	Key Investors
LimX Dynamics	Pre-IPO	~\$200M	IDG Capital, Lens Technology, GGG Group (Europe), Stone Venture (UAE), 华山资本 Silicon Valley
Xinuo Future	Series A+	RMB 500M	Meituan (lead), NIO Capital, China Merchants Capital, Xiaomi
Various	Multiple rounds	~RMB 10B	June 2026 代表性融资合计
