

# China New Energy Industry Quarterly Data

## Briefing — Q2 2026

**Published:** August 2026

**Next Issue:** Q3 2026 (expected October 2026)

### What's Inside

本期关键词

Renewable energy accounts for 73.9% of new installations

Wind + solar installed capacity reaches 1.95 billion kW

NEV sales surpass 7.44 million units in H1

NEV penetration hits 62.8% in June (retail)

Power battery installations reach 336 GWh in H1

### Three numbers that matter

**Renewable energy accounted for 73.9% of all new power installations** in H1 2026 — the energy transition is no longer a policy goal, it's the dominant reality.

**NEV penetration reached 62.8% in June**, up from 39% in January — the "oil-to-electric" shift is accelerating at an unprecedented pace.

**Power battery installations reached 76.5 GWh in June alone**, up 31.5% year-over-year — the battery supply chain is scaling to match demand.

## What changed this quarter

Wind + solar generation exceeded 1.2 trillion kWh in H1, accounting for ~25% of total electricity consumption

NEV penetration crossed 60% and held for three consecutive months

LFP battery share increased to 83% of monthly installations

China became the first country with total power generation capacity exceeding 4 billion kW

## Part 1: Power Generation & Installed Capacity

### 1.1 Total Installed Capacity

As of the end of June 2026, China's total power generation capacity reached **4.01 billion kW**, making it the **first country in the world to surpass the 4 billion kW milestone**.

Renewable energy installed capacity reached **2.455 billion kW**, accounting for approximately **60.7% of total installed capacity**.

### 1.2 Wind + Solar Installed Capacity

Wind and solar power installed capacity combined reached **1.95 billion kW** by the end of June 2026, up **16.8% year-over-year**.

Breakdown:

**Solar power:** 1.27 billion kW, up 15.8% YoY

**Wind power:** 680 million kW, up 18.5% YoY

### 1.3 New Installations (H1 2026)

Total new power installations in H1 2026 reached **158.7 GW**.

**Renewable energy new installations: 117 GW**, accounting for **73.9% of all new installations**.

Breakdown of renewable new installations:

**Solar:** 72.07 GW

**Wind:** 38.62 GW

**Hydro:** 6.03 GW

**Biomass:** 0.60 GW

**Key context:** Solar new installations declined 66% year-over-year from 212 GW in H1 2025, but remain above the H1 average of 2021-2024. Wind new installations declined 25% YoY.

### 1.4 Power Generation

Renewable energy generation continued to grow in H1 2026, accounting for **approximately 40% of total electricity generation** — exceeding the

combined electricity consumption of the tertiary sector and urban/rural residential use.

**Wind + solar generation exceeded 1.2 trillion kWh**, accounting for approximately **one-quarter of total social electricity consumption**.

## **Part 2: New Energy Vehicle (NEV) Market**

### **2.1 Production & Sales (H1 2026)**

**H1 2026 production:** 7.438 million units

**H1 2026 sales:** 7.446 million units

Year-over-year growth: **+6.7% (production)** and **+7.3% (sales)** respectively.

**June 2026 monthly data:**

Production: 1.598 million units (+26% YoY)

Sales: 1.643 million units (+23.6% YoY)

NEV share of total vehicle sales: **58.5%**

### **2.2 Penetration Rate**

NEV penetration has shown a remarkable upward trajectory throughout 2026:

**January:** 39%

**June:** 62.8% (retail)

**Held above 60% for three consecutive months**

**June NEV wholesale penetration:**

Overall: **62.8%**

Domestic brands: **73.9%**

## **2.3 Powertrain Mix**

**Pure electric vehicles (BEV) accounted for approximately 67% of NEV sales in H1 2026, representing 4.989 million units.**

BEV has become the **dominant powertrain** in the Chinese auto market, while extended-range electric vehicles (EREV) are facing growth bottlenecks.

## **2.4 Exports**

**H1 2026 vehicle exports:** 5.096 million units, up **65.3% year-over-year**.

**June 2026:** Monthly exports exceeded **1 million units for the first time**.

**NEV export growth:** up **126% year-over-year** in Q2 2026.

## **Part 3: Power Battery Industry**

### **3.1 Installations (H1 2026)**
